Installation Check List

Are you prepared for the installation of your new security or fire alarm system? These are the items that must be in place for the system installation to be completed.

Before your installation can be scheduled, Holicong must receive the following:

- The contracts signed in all places
- The deposit for the installation
- A completed yellow Subscriber Form. If this was not completed previously, please complete and fax to our office at 215-794-0837.

If you are renovating or under new construction, please be mindful of the following:

- Don't forget, ALL PRE-WIRING must be completed prior to the installation of the insulation and wall sheathing. Please remind your contractor.
- Please allow at least one to two weeks notice to schedule either pre-wiring or your final installation.
- When calling to schedule the final installation, all dusty work must be completed and the areas where smoke detectors are to be installed should be dust free.
- Scheduling of a final installation will require all painting be complete in the areas that detectors will be installed.

Things that must be in place prior to Holicong's arrival for your system installation:

- Power on site** - An outlet must be at or near the control panel area (This should **NOT** be a GFI outlet)
- Phone Service** - The system can not communicate to the Central Station without dial tone. Code requires two lines for all Commercial Fire Systems. The telephone service should be near the control panel area. Have you notified your Holicong sales representative of any special internet or phone services at your location? Example - DSL, Vonage, Comcast Digital Voice ... etc.

With the above items taken care of you are helping to insure a smooth installation. We look forward to doing business with you and welcoming you into our protected family.

*** Reminder - Final contract payments will be picked up at time of installation.**
